

QuEST Global SEZ Profile

QuEST Global SEZ is India's first ever notified precision engineering Special Economic Zone (SEZ) at Belgaum, Karnataka providing the best-in-class facilities and infrastructure for Aerospace, Automotive and Industrial engineering industries. The development is spread over 300 acres and is currently focused on developing the Aerospace supply chain ecosystem for OEMs, suppliers, ancillary and related end user industries. This enables complete offerings of design to build services, right from the concept to the finished product that can be used to build an aircraft. This is a unique offering from QuEST Global that is set to gain widespread appeal in the aerospace industry, as companies consolidate their supply chain and look for more value-add from their suppliers. Along with a facility for QuEST Global Engineering and QuEST Global Manufacturing, API (Aerospace Processing India Pvt. Ltd.), a joint venture between QuEST Global Manufacturing & Magellan Aerospace has also set up a unit for establishing special processing capabilities within the SEZ.

Benefits of the QuEST Global SEZ ecosystem

- India's first Precision Engineering SEZ catering to the Aerospace Industry
- Complete 'design to build' services under one roof
- World-class facilities and infrastructure to positively impact the supply chains of, Automotive, Industrial Engineering and Aerospace sectors
- Facilitates the strategic advantage of having players across the value chain in the fields of Precision Engineering and Manufacturing in the same location. This would save the time taken in moving parts from one location to another, as well as the associated cost of logistics
